

Hello. Please find below the instructions for your putty compound Impression Kit. I suggest reading through them carefully and/or even printing them out. Remember to relax, and have fun with it... and as always, N'Joy the Kaos!

## **DIRECTIONS FOR MAKING A KAOS IMPRESSION**

### ***READ THRU CAREFULLY FIRST BEFORE MAKING YOUR IMPRESSION!***

So...you want fangs. You want to put an edge to your smile. Fangtastic! 'Cause we're here to help. Regardless of whether you want classics, shorties, to resemble your favorite True Blood stars, sport black pleather like Selene, get a full set, or run with the pack in an exquisite set of werewolf teeth, we can sharpen your grill. Now, let's get down to it & play!

First off...Let's open you package:

#### **What We Sent You...**

- Alginate Putty Compound – *Supplied in separated nifty handy sealing plastic bags.*
- Nifty Handy Sealing Plastic Bag – *aaahh, yeah, don't tear it or lose it 'cause yer gonna need it later*
- Bite Trays – *Supplied, as well. **RETURN THEM!!!!***
- Stickers– *Oh, yeah! Cool.*

Now...Here's what you do:

--Make Only the impression for the palate you are getting fanged.

--*For Double Impressions Only:* This is for an upper and lower palette order. Make one impression at a time. Do Not attempt to make both the top and bottom at the same time.

--Put on the cool black gloves and set your bite tray out for easy access. Remove both colored putties from their bags. Set bags to the side. Do Not allow the putty to have contact until you are ready to mix. Once ready Knead the putties together, blending them, until there are no streaks, and it is one solid purplish blob.

--Then roll the putty out and fill into the bite tray, along the area where your teeth will fall.

--Place the putty-filled Bite Tray into your mouth, biting down all the way, in the CENTER of the tray & putty. Maintain a tight and firm bite for about 30 Seconds to 1 Minute where the paste will harden, or at least begin to harden. During which time you can: A). Clean Up Your workplace, B). Do Nothing, C). Marvel At Your Awesome Chemistry Skillz, D). Read one of the

incredible vampire books in the One Blood series that Stavros has written, or his zombie novel or a poetry book, or E). Other.

--To remove the Bite Tray from your mouth, put your fingers in a peace sign (*pointer & middle finger extended*), and moving between the tray's little handle pull slowly down on both the "hardened" Alginate Paste and the Bite Tray. Or use both hands, one on either side and pull slowly down - straight down, no wiggling! *You will incur some suction, so go slow.*

--Examine the impression's form of your teeth after you wipe all the spittle and Alginate out of your mouth. *If* the impression looks bad, like it is too shallow and you didn't bite down all the way, and/or the gum line and other tooth forms are unclear, then clean out your tray and email us. *If* the impression looks good, with all your teeth clearly displayed with a nice and visible gum line, then rinse it off in the sink if there are any weird particulates. *If* you are unsure how it looks, or just want confirmation, text message Minion with a picture of your impression, to [505-227-6674](tel:505-227-6674), and she'll let you know.

--To prepare your impression for shipping: **WRITE YOUR NAME on the bag. Yes, the Name Your Placed Your Order Under, not some hey I am this person today name. Then put your new fangled impression into the bag and seal it tightly.** That's the "it". Identifying yourself in ink so we know that your impressions belong to you.

**Kaos Shipping Recommendation:** *Use your regular post office services - either send it first class or Priority. Priority even provides their own boxes, so yay! to that. Using UPS is a gamble. Fed-ex is usually better, but still costly for what's needed. Truth...other carriers, other than the Post Office, lose, misplace, fail to deliver and lie about it, usually in an equal portion to when they actually just deliver the package. \*For Foreign shipping options, please use your regular Post Office services, unless they have proven unworthy, in those instances Fed -Ex is recommended as they seem to handle foreign deliveries better than local ones. And...*

**\*NEVER:** *Ship your impression(s) requiring a signature. That is a guaranteed way to ensure that your delivery will be delayed or even lost.*

**SEND TO: 151 Camino Sin Pasada rd. Corrales, NM, 87048**
